

# MAXIMIZING YOUR VALUE-BASED PAYMENTS USING CPT CATEGORY II CODING

**CPT** category II codes are used to measure performance on quality metrics in Healthcare Effectiveness Data and Information Set (HEDIS), Care-Based Incentive Program and Value-Based Program. The Alliance uses them to track and fulfill your Care-Based Incentives and Value-Based payments.

**The Alliance** highly encourages clinical office and billing staff to use CPT Category II codes for performance measurement in order to decrease the need for provider data submission, record abstraction and chart review - **your payments, faster!**

**CPT II CATEGORY CODES ALWAYS CONSIST OF...**

a  
four-digit  
number

**2032F**

followed by  
the letter F

## **CPT** CURRENT PROCEDURAL TERMINOLOGY II CODES

were developed by the American Medical Association (AMA) as a supplemental performance tracking set of procedural codes in addition to the Category I and III coding sets.

Category II codes are optional, and cannot be used to replace Category I codes for billing purposes.

## **CPT CODE FUNCTIONS**

CATEGORY I CODES  
**E&M, ANES, SURG, RAD, LAB**

CATEGORY II CODES  
**TRACKING**

CATEGORY III CODES  
**EMERGING TECH**

## CHRONIC DIABETES CARE (CDC)
